## Advanced token security via token rotation

Recommended for developers building on or for security-minded organizations - opting into token rotation allows app tokens to automatically expire after they're issued within your app code. View documentation.

At least one redirect URL needs to be set below before this app can be opted into token rotation

Opt In

## OAuth Tokens for Your Workspace

These OAuth Tokens will be automatically generated when you finish connecting the app to your workspace. You'll use these tokens to authenticate your app.

Install to Workspace

#### This app was created by a member of your workspace, Python-Starter.

# Python-Starter-App is requesting permission to access the Python-Starter Slack workspace

What will Python-Starter-App be able to do?
